

LanSchool Home v7.5

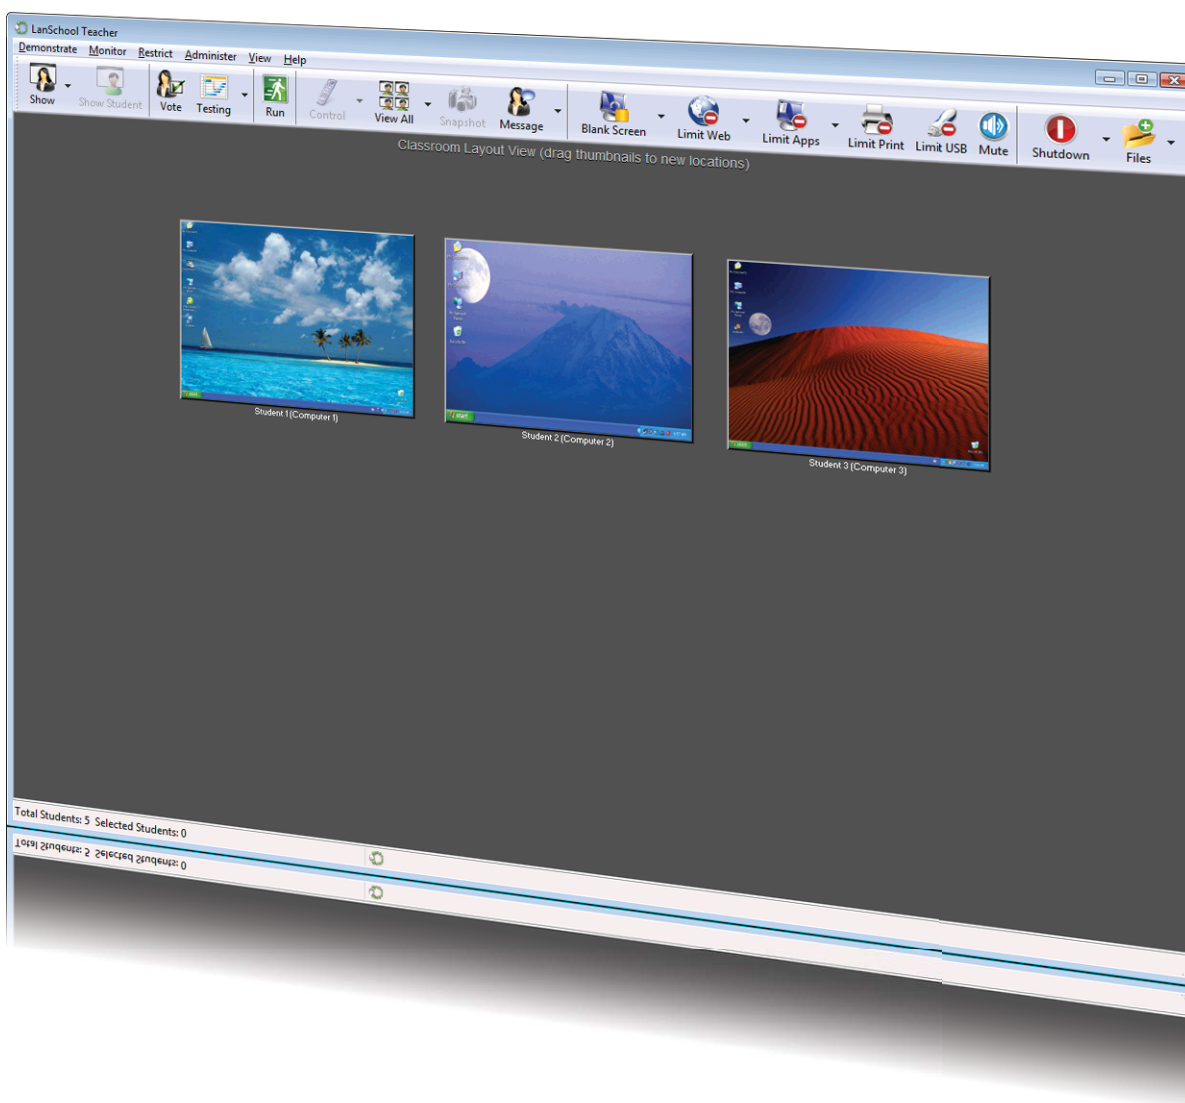

Protect and monitor your family's computers

Parents today are faced with the challenge and opportunity of using technology in the home. Computers are amazing educational and entertainment tools, but they can also be a huge distraction and danger to kids.

LanSchool Home v7.5 allows parents to easily keep track and restrict what happens on the family computers.

LanSchool Home v7.5 helps parents:

- Monitor real-time thumbnails of their home computers
- Limit distractions such as the Internet, games and instant messaging
- Track Internet history
- Log every keystroke typed on a computer
- Limit computers access by locking out the computer
- Provide help through remote control
- Chat with family members

Key Features

LanSchool Console

- Runs on Macs and Windows
- View 3 thumbnails of computers at a time

Web Limiting

- Limit websites across all Windows browsers
- Allow or block specified websites
- Display allowed or blocked websites to family members
- Restrict private browsing in Internet Explorer

Application Limiting

- Allow or block specified applications

Application and Keystroke Monitoring

- Monitor applications and keystrokes on family computers

Blank Screens

- Stop computer access by blanking their screens, showing a custom message and locking out their keyboards and mice

Remote Control

- Help a family member by taking control of their computer's monitor, keyboard and mouse
- Remote control multiple computers at the same time

Send a Message

- Send a text message to all or selected computers

Question/Chat

- Family members can click on the LanSchool icon and type in a question for the parent
- To respond, parents can initiate a text-based chat session with the family member

Muting

- Turn speakers on or off from the parent's console

Print Limiting

- Allow or block printing for all or selected computers

Drive Limiting

- Allow or block USB/CD/DVD drives for all or selected computers

Send and Collect Files

- Send and collect files to and from family computers

Power features

- Shutdown, logoff or restart family computers
- Power on computers remotely using Wake-on-LAN

Running Applications

- View all running applications on family computers and add those applications to the allowed or blocked lists

Internet History

- View all Internet Explorer browsing history
- Family members cannot delete browsing history

Screen Snapshot

- Take a snapshot of the family member's current computer screen

Anti-tampering controls

- LanSchool prevents family members from unloading or disrupting the software

Show Screen

- Show the parent's screen on the family members monitors
- Co-browse the Internet, family browsers follow the parent

Show Family Member to the rest of the Family

- Allow a family member to take control and demonstrate their screen to the other members of the family

SYSTEM REQUIREMENTS

LanSchool Home v7.5 supports any combination of computers running Windows 98, Windows 2000, Windows XP-32, Windows Vista-32/64, Windows 7-32/64, Mac OS 10.4 and higher.

The only exception is the LanSchool parent console for the Mac, which will only run on Intel-based Mac hardware running OS 10.5 and higher.

Listed below are the minimum requirements necessary to run LanSchool v7.5 on both the parent and family computers:
